MAKE YOUR IDEA INTO LABEL

R&D

Our number one goal is to continue our companies progressive research and development in new technologies.

EFFICIENCY

With our fully automated operation and high efficiency operation modes, work can be completed as soon as possible. We are the field's number one in efficiency.

SERVICE

Only professionals with years of experience are able to understand the customers frame of mind and provide special customized services.

DESIGN

We create the most eye-catching packaging stickers, built to specification and based on the needs of the customer.

Kang Yang Printing Co., Ltd. was established in 1984 in Taiwan. We are professional sticker printing manufacturer and have long-term experience over 28 countries.

We have innovative typography technology and numerous sticker patents. We make stickers not only stickers, but can combine marketing activities. We have customers from various industries, such as Food, Beverage, Chemical, Personal Care, Pharmaceuticals & Healthcare, Electronic, Household Care..etc.

Kang Yang Printing Co., Ltd provides fully automatic consistent operation with high efficiency and experienced sales team. We are FSC®-certified from 2018 and also possess ISO-9001 certification to provide customers high standard products.

We have innovative typography technology, and numerous patents so that we believe we will be your best printing partner by our high efficiency good quality and most innovative product.

2 Ply Scratch Sticker with Serial Number

- It can combine lottery activities and marketing promotion.
 - It can print different QR code and garbled characters.
- This can combine online activity by sticker to become your best marketing tool.
- This patent invention number is I714458.

Booklet Sticker with Variable Number

- Curtain mode booklet label, up to 9 pages (9 times larger than 1 layer label)
- Great for providing product instructions or marketing information on small package, bottles, and cans.
- It can combine package insert and inspection together. It can save lots of time and cost by fully automatic consistent operation.
- **This patent invention number is I787102.**

2 Ply Sticker

- 2 Ply sticker increases double or even triple capacity for useful space.
- Replace traditional instruction manuals by directly sticking the 2 ply label on the product, and protect your information from becoming lost.

Pop up 2 Sides Printing Stickers

- You could fold the stickers to make it stick on your products to catch the attention.
- The back side of the stickers could be printed different QR code for each one which can combine marketing activities.
- You could customize your own design and shape.

High Quality Pattern Cold Foil Printing

- The quality of cold foil printing is better than hot foil printing. The text and pattern can be metal outcome after cold foil printing.
- There is no size limit and no thickness limit of character, and there are various colors for choose.
